

Claims

1. (Previously presented) Magnetic work apparel comprising:

an elongated belt member having two opposing ends with mating fasteners adjacent each end for securing said belt about a wearer's waist;

at least one magnet embedded within said belt member;

a plurality of fasteners positioned on said belt member;

a magnetic accessory apparel item removably securable to said fasteners.

2. (Previously presented) The magnetic apparel according to claim 1 wherein said accessory item comprises:

a glove having a wrist portion, a hand portion extending from said wrist portion, said hand portion including a backhand portion with a magnet embedded therein;

a fastener means positioned adjacent said wrist portion for mating with said fastener on said belt to secure said glove thereto.

3. (Previously presented) The magnetic work apparel according to claim 1 wherein said accessory item includes a belt clip having a magnet embedded therein.

4. (Previously presented) The magnetic work apparel according to claim 1 wherein said accessory item includes a wrist band having two opposing ends, each having a mating attachment means adjacent thereto for securing the wristband about a wearer's wrist, said wristband having a magnet embedded therein;

a fastener means positioned on said wristband for mating with said fastener means on said belt.
